Transport Security, Inc. Announces Addition of The ENFORCER® Geo1 Covert Portable Asset Tracking

The ENFORCER® Geo1 with ENFORCER® online tracking service provides an end-to-end solution for covert tracking applications. Based on Qualcomm gpsOne™ assisted location-position technology, the ENFORCER® Geo1 operates in impaired environments

September 21, 2010 – Transport Security, Inc. - Waconia, MN (<http://www.transportsecurity.com>) Announces the Addition of The ENFORCER® Geo1 Covert Portable Asset Tracking Technology to its Arsenal of Security Solutions

Transport Security, Inc- ENFORCER®, a leading provider of High Security Solutions for the Transportation and Supply Chain Sectors, today announced an addition to their Covert cargo and portable tracking solutions, The ENFORCER® Geo1, a low-cost, high performance covert tracking device.

The ENFORCER® Geo1, (<http://www.transportsecurity.com/products.php?id=geo-1>) along with ENFORCER® online tracking service, provides an end-to-end solution for covert tracking (applications). Based on Qualcomm gpsOne™ assisted location-position technology, the ENFORCER® Geo1 tracker operates in impaired environments with no clear view of the sky. Examples include inside buildings, embedded in high-value cargo, and hidden under vehicles. Superior battery management sets the ENFORCER® Geo1 apart from competitors. Powered by the Qualcomm inGeo™ platform, the ENFORCER® Geo1 operates on patented “Low Duty Cycle” technology which provides unique hibernation capability, producing best-in-class operation and standby time.

The ENFORCER® Geo1 features small size, value-priced, tracking and monitoring.

ENFORCER® Geo1 Product and Service Features

- Locates target object accurately and quickly.
- Operates both in and outdoors, such as inside buildings, elevators, (even through) and secured containers.
- Internal GPS and cellular antenna.
- Provides real-time location tracking and monitoring information.
- Small size easy to fit inside packages
- Long battery life.
- Ease of use. Services can be configured over-the-air remotely.
- Flexible deployment scenarios including tracking and monitoring packages, valuable assets and personnel.

About Transport Security, Inc.

Transport Security, Inc. - ENFORCER® (<http://www.transportsecurity.com>) is a leading Cargo Security Company that has been providing High Security Solutions for the transportation, supply chain and retail sectors for over 25 years. With the combination of its ENFORCER® Physical Security Locks (<http://www.transportsecurity.com/products.php?id=locks>) and C-TPAT Security Seals (<http://www.transportsecurity.com/products.php?id=seals>) for trucks, trailer and containers, the addition of the ENFORCER® Geo1 to their security solutions allows for a complete end to end security solution for companies.
