FOR IMMEDIATE RELEASE

Concentric Security, LLC Receives Contract Modification Approval to Their GSA Schedule Under Group 84 – Law Enforcement and Security

Concentric Security, one of the nation's foremost Perimeter Security Construction companies, received approval for modifications submitted to GSA for the company's existing GSA Schedule under Group 84 – Law Enforcement and Security.

Sykesville Maryland, April 15, 2010 – **Concentric Security, LLC** announced the approval of modifications to its existing GSA Schedule Contract # GS-07F-0100M under Group 84 – Law Enforcement and Security. This makes **Concentric Security's** GSA Schedule the most comprehensive of its kind for force protection and homeland security solutions dedicated to perimeter security construction and facility hardening.

"These modifications will allow **Concentric Security** the increased ability to serve our government customers and create tailored security solutions from a much broader range of products and services. With now over 10,000 products on GSA Schedule, we are well positioned to meet the evolving needs of our customers." Said **Concentric Security's** President, David Wachs.

Concentric Security's expanded schedule offers the government sector more choices in active and passive vehicle barriers, ballistic rated and non-rated guard booths, anti-ram and anti-climb fencing, gate houses, security controls, architectural pre-cast concrete, glass hazard mitigation, explosive containment and product installation. Federal, State and local government organizations now have an expanded opportunity to purchase through the GSA Schedule thereby insuring best value, shorter leads times, lower administrative costs and most favored customer pricing.

"We would like to thank GSA region 7 and our contracting officer for working closely with us as we prepared this significant modification. The ongoing efforts of all parties insured that we are able to better serve our governmental customers." said **Concentric Security's** CEO Mark Oakes.
