## Speco Technologies Adds Focus Free IP Cameras To The Complete Line

August 16 , 2010 - Amityville, NY

Speco Technologies has added focus free technology to the IP camera line. These network cameras can see crystal clear images from inches to infinity without refocusing the camera which makes the installer's job easier. These cameras are great for high ceilings, poles and similar applications.

Speco Technologies IP security surveillance product line, Speco Internet Protocol (SIP), provides enterprise level features in a platform that is compatible with major third party software suites such as Milestone Systems, ONSSI and 45 others.

Speco Technologies newest Focus Free SIP IP Cameras. Dome (SIPD3FFi) and Bullet (SIPB1FFi) versions. *Imagine - no call-backs to fine tune camera focus after installation!*

The SIP IP camera series also includes both standard resolution with Intensifier2 technology and 1.3 megapixel cameras with H.264/MPEG/MPEG4 compression which ship with a full featured NVR software suite. IP cameras are perfect for use in casinos, government, schools, transportation (National traffic system), airports and other large business applications.

#### Features:

- Adjustable bandwidth to meet all network infrastructures
- Power Over Ethernet\* (IEEE 802.3af) and/or 12V DC supported
- Features 2-way audio
- Works with Speco Technologies hybrid DVRs as well as other major manufacturers
- Video servers and decoders also available
- 5 year warranty
